

Dear Potential Admission,

Glendive Medical Center requires new resident to pay in full the remainder of the admission month and the next month on the date of admission.

The current room rate is \$345.00 per day equaling out to \$10,695.00 for a 31 day month and \$10,350.00 for a 30 day month.

If a Long Term Medicaid Application is needed after that it is expected that the Residents monthly income, including but not limited to Social security, pensions or retirements is paid to the facility each month until the Application is completed at which time Medicaid will assign a monthly responsibility for the resident to pay. If this process results in a back balance owed to the facility the resident is responsible to make the maximum amount possible payments to that back balance on top of the Medicaid monthly responsibility, however if this results in a credit on the account a refund will be issued.

It's also expected that all information requested by Medicaid is provided by the due dates designated by Medicaid.

If an account becomes 45 days past due or information is not turned into Medicaid, the discharge process will begin.

Best Regards,

Glendive Medical Center
